Car expense tracker.

What does your car really cost? Add up every receipt each month. After a year you'll know your real **cost per mile**, which helps with budgeting and with your next car.

Year _____ Car _____

Month	Fuel or charging	Insurance	Loan or lease	Maintenance and repairs	DMV, smog, registration	Tolls and parking	Wash and other	Month total
January								
February								
March								
April								
May								
June								
July								
August								
September								
October								
November								
December								
Year total								

Tip: registration renewal, insurance and smog come once or twice a year. Divide them by 12 and set that amount aside every month. Estimate DMV fees with the DMV Fee Calculator at dmv.ca.gov.

Fuel and charging log.

Fill in at every fill-up or charge. **MPG** = miles since last fill-up ÷ gallons. For an EV, track kWh and cost.

Date	Odometer	Miles since last	Gallons or kWh	Price per gal / kWh	Total paid	MPG or mi/kWh	Where

Cost per mile

Year total (page 1) _____

Miles driven this year _____

Cost per mile = total ÷ miles _____
